A passionate, dedicated, self-motivated front-end engineer who loves to build fast, modern, responsive single and multi-page web applications and help customers provide stable, performant, and scalable products and services with interactive capabilities.

TECHNICAL SKILLS

- HTML/CSS, JavaScript (ES6+), Git, JIRA
- Responsive Design, Flexbox, Grid, Sass, TailwindCSS
- React, Redux, Next.js, Webpack, Contentful
- REST API, Express, Node.js, Firebase,
- Mocha, Cypress, Circle CI, Netlify

SOFT SKILLS

- Accuracy and attention to detail
- Highly organized with a strong work ethic
- Excellent critical thinking and problem-solving skills
- Reliable team player with a collaborative mindset

EXPERIENCE

Software Engineer

Newfold Digital (formerly Endurance International Group)

July 2018 – July 2021
Burlington, MA | Full-time

- Built and maintained robust, reusable e-commerce UI components using React and Redux to ease feature development and integration for multiple internal teams
- Added over 50+ bug-fixes and features along with unit tests to enhance and improve active single page application (SPA) for customer registration and checkout
- Integrated Contentful CMS to dynamically prefetch product metadata to enable marketing teams to make custom changes quickly without code releases
- Frequently collaborated with internal front and backend services teams to integrate new products and payment gateways
- Worked on a fast-paced agile environment with multiple releases per sprint basis

Software Engineer

Lexia Learning

September – December, 2016 | June – August, 2017
Concord, MA | Contract

- Built 20+ JSON schemas to validate and structure large, nested JSON objects, or lesson tasks for production-level reading software program
- Written various JavaScript functions or snippets to automate JSON file modifications to simplify and speed up application content updates.

PROJECTS

LogTrade — Frontend Development w/ React, Firebase and Netlify

Oct 2021 – Present

- A personal journal for keeping track of all your trades online
- Built w/ React and TailwindCSS on the client-side for modular, responsive user interface
- Utilizes Firebase Firestore and Auth for data storage and customer authentication/registration

Regexer — NPM Package

Jun – Jul 2018

- A utility library of functions that leverage regular expressions to validate different types of inputs
- Build with ES6+ features, bundled w/ Webpack in UMB format to support use on both client/server-side
- 100% unit-test code coverage w/ Mocha along with auto-generated documentation w/ ESDoc

EDUCATION

DevMountain

Web Development Immersive Program

Dallas, TX
May – August, 2016

Remote Learning: Frontend Masters, freeCodeCamp, Egghead.io

Meetups: Built with Code, Code for Boston
